

## Varanger

Recently crowned test winner in an extensive lavvu comparison by Norwegian outdoor magazine Vilmarksliv, Varanger is our new fully loaded model. The outer tent is made of a specially developed fire retardant Helsport Rainguard® which is ideal for use in lavvu. The opening has protected double zippers and fire retardant mosquito mesh. Two Helsport AirflowII® ventilation ducts combine with an internally adjustable top opening to ensure sufficient airflow inside, preventing condensation and improving air quality. The aluminium centre pole is light and makes for easy set up and the many guy line points increase stability during high winds. A drying rack and mesh cover for the top opening are included. Varanger can be upgraded with a fire retardant inner tent and ground sheet with an opening for fire or cold pits.

- Test Winner in Norwegian 'Vilmarksliv' magazine, Jan. 2006
- Helsport Rainguard® Flame retardant outer tent
- Aluminium Center Pole
- Compatible with Helsport Lavvu Oven
- Attachment points for inner tent and floor (sold separately)
